Profile :

Hi my name is Sachin B S , to say about myself ...I, don't have a particular hobby or a particular schedule for myself. I just do things whichever I feel like doing at that particular time. I just take things as it goes. why to complicate things right! Just keep it simple as that.

We don't forget to enjoy the beauty of the rose thinking it has thorns and they might hurt. Why don't we apply it to the humans too... just enjoy the good in everyone...every person we meet has a story to inspire, has a lesson to tell, gives us some experience to remember forever.

I am also a student who thought someday I will get a picture of what do I become in my future. I tried hard finding what is my interest, who am I and what do I like. But the result is I found nothing. Seems funny right !!! but day after day slowly I realized that there is no destination and it's only about the journey. it's only how much you learn in the journey, the people you meet , the experiences you get with them and the impact they create on your life and most importantly the impact you leave on them.   Just experiencing and learning is the only continuous process which keeps you evolving. You can't satisfy everyone. Instead satisfy yourself.

And that's why I started with that particular quote by Socrates. Every moment you live, you learn something, and you evolve every minute.

So just relish every moment of yours and be thankful for what you are. At the end you always have tomorrow :)

Hope you enjoyed ;)

CV :

About : Hi, My name is Sachin B S from CMRIT Bengaluru, I completed my 1 to 10 std in Bengaluru and then moved to my home town for studying 11th and 12th and I joined CMRIT after my 12th with CSE degree

Address : Kundalahalli

Phone Number: 63*0*1*586

Email(personal) : sachu2170@gmail.com
